THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

**NOW OPEN FOR CONSULT!**

**THE FUTURE IS OURS TO CONSTRUCT.**

**INTRODUCING THE D.P.B.T.S.E. & L.L.M.'S**

THE·DEE·PEE·BEE·TEE·S·EE

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

**WARNING:  
INFORMATION  
OVERLOAD!**

Proposal and start body of knowledge.

WARNING: INFO OVERLOAD.

Write an intro or think about a sort of parental advisory.

Make of this wicked problem a challenge and a paragraph for LLM docs and pres..

For 1/2 process (also emphatic building) serendipity (M.I.T.I.U.S.)

Exploration versus exploitation.

Interesting: open ended exploration versus final cause (cosmology)

# THE·DEE·PEE·BEE·TEE·S·EE

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

LLM experiments. LLM expertise. LLM's and dedicated LLM's.

-Prompting and Dead Philosophers training. DPBTSE vault. Dead Philosophers Dialogue.

-Next: The DPBTSE and the development of (a) virtual representatives for The DPBTSE as a first prototype.

-LLM presentation and demo(s)

1. DPBTSE\_experiments\_update.pptx

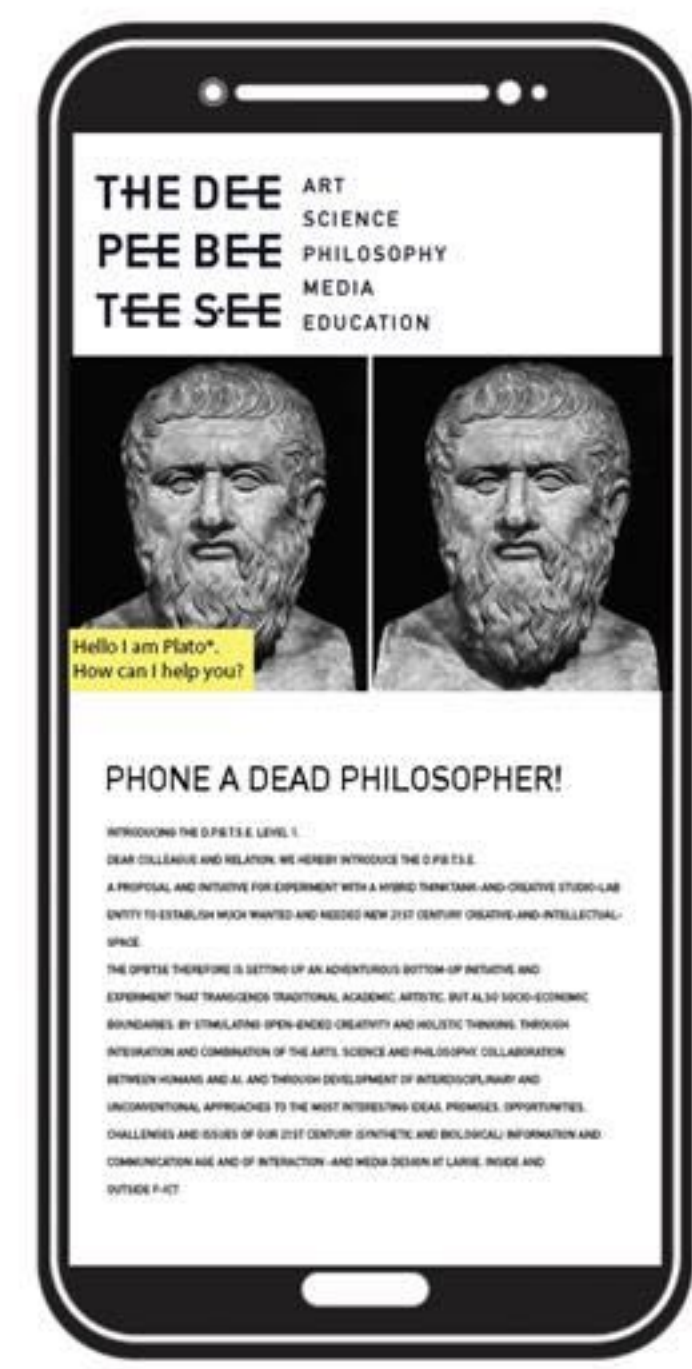

2. DPBTSE\_rep\_demo.mp4

-LLM proposal on request of Mark and Sjoerd based on this; under construction.

-LLM and generative a.i. for community moderation, digest of information, virtual representatives, chatbots, personal assistants, human machine cooperation etc.

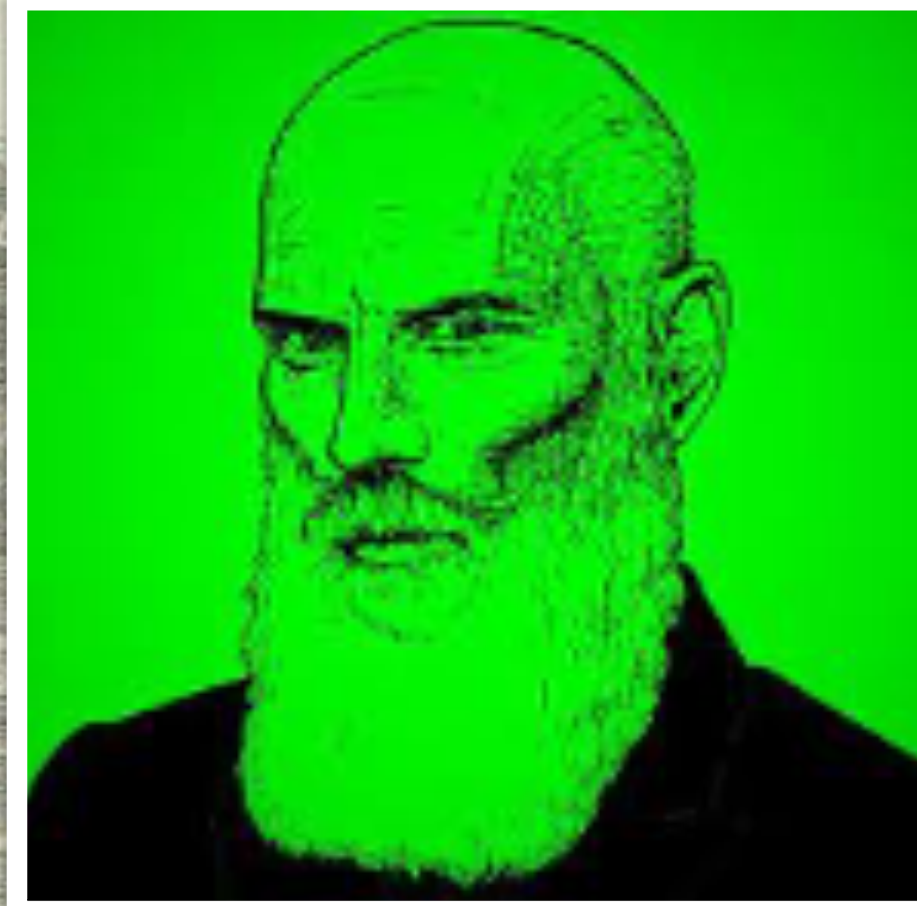

-For a range of applications that moderate information for more or less complex purposes ranging from simple way finding and information retrieval to education, journalism and democracy.

-Compiling a team and pool of developers / prototypers (internally and externally) to get momentum.

# THE·DEE·PEE·BEE·TEE·S·EE

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

History is watching

-Think-tank and Create-tank. Think and create in a 21st century manner.

-Humanity Centered Design Manifesto. HYCD (definition).

## 3. [Humanity centered design.pdf](#)

[The psychology of transformative change.pdf](#)

[Existential Ethics and Sustainocracy V2.pdf](#)

## 4. [Media Design Manifesto.pdf](#)

-LLM technical and philosophical (the UX of a.i. / LLM AT LARGE. The things we valued in human centered design have become even more important...on steroids)

-Every expert in a.i. acknowledges and emphasizes the need for multi -or meta disciplinary approach and knowledge / insight. This is not some whimsical brainwave.

We aim to be 'thought leaders' in this.

-Overlap LLM and current and future projects (and funding) like Real and virtual communities, Emphatic building /. Emphatic spaces,

-We propagate a combination of the Arts, Science and Philosophy and a multi -or meta disciplinary stance with regards to everything and everything pertaining to A.I.

-We propagate a combination of knowledge and creativity. Knowledge is not in the way of creativity as the romantic ideal of the most inner individual expression suggests.

THE DEE  
PEE BEE  
TEE SEE

ART  
SCIENCE  
PHILOSOPHY  
MEDIA  
EDUCATION  
RESEARCH

**-The question is: what kind of interactions do we need and want?**

**-What do we consider to be emphatic and desirable or not desirable interactions? These are big questions concerning the human condition.**

**-Immediately as A.I. and LLM are on the table the need for multi - or meta disciplinary perspective is naturally on the table as well.**

**-This is very likely only the beginning both technically and business wise (commercial promise of a.i.).**

**The future of the 21<sup>st</sup> century is not about shaping our environment but also about shaping humans and humanity more directly than ever before. Humanity Centred Artificial Intelligence; This is our command and inspiration!**

# THE·D·P·B·T·S·E

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

-Even the narrative and discourses concerning a.i. and LLM's is complicated as different agendas are in play. Do not forget that the promise of a.i. and LLM businesswise is HUGE and so are the possible downsides on micro and macro level.

-We suggest and propose a coordinated approach to developing a body of knowledge and expertise of LLM application. And suggest an expert opinion and direction on the coordination and direction of this.

-The DPBTSE & The IXD research group have an expert in their midst. Olaf Janssen.

-The DPBTSE is now open for consult: we offer...the opportunity of pro-actively talk to and consult us for your projects.

# THE · DEE · PEE · BEE · TEE · S · EE

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

A couple of examples from micro to macro level.

- The real ethic; how can we deploy technology ethically in an unethical world.
- The 21 st century technology will not only potentially change the world. It will potentially change who we are more directly than ever. How are we going to do this? If the maker becomes the made what then shall we do?
- We are largely still stuck in the 20th century paradigm. But the 21st century is already 1/4 under way.
- We need a new century not an old one.
- The technological future is not a determined future.
- Solutionism.
- Data-ism.
- Exploration versus Exploitation
- What kind of interactions do we want and do not want??
- Homo Informaticus / Info overload. (The real overarching challenge and a very wicked problem indeed. Very wicked.)
- Late capitalism; we need a change and paradigm shift. For crying out loud; Sam Altman (and other sun kings) is a doomsday prepper. Zuckerberg owns a 250 million dollar doomsday bunker with an inflammable moat. This is toxic.
- Meaning crisis. Lack of meaning and therefore imploding motivations and increasing dis-orientation and alienation.
- Opportunistic if not destructive business and commercial agendas; time to grow up as humanity! Instantiation perversion.
- Complexity and simplicity; solved complexity. Making sense.
- Condition humane generally and after decades of neo 'liberal' (not liberal at all!) paradigm. It is cynical and is pure opportunism. and we are sick and tired of it. We should not be slaves to the marketplace (a singularity). Francis Bacon (idols of the tribe, marketplace, theatre and idols of the cave).
- Empathy with past, present and future.

Pros and Opportunities

To be completed

Cons and challenges.

To be completed

# THE·D·E·E·P·E·E·B·E·E·T·E·E·S·E·E

THE DEAD PHILOSOPHERS BRAINSTORM TO SOLVE EVERYTHING

-In other words and in short: LLM / A.I. utopia and dystopia!

-LLM'S AND BLABLABLA.

If the maker becomes the made what then shall we do?

Man made the hammer and the hammer made the man.

-BECOME and REMAIN KNOWLEDGEABLE, CREATIVE AND CRITICAL!

-NOTHING IF NOT CRITICAL.

-Do not believe the hype and party for your right to fight.

DPBTSE: OPEN FOR CONSULT. Feel free to contact Olaf and John in general for different perspectives and catalysts on your projector and pertaining (in this case) to LLM and generative a.i.

Overarching hypothesis and ideal of The DPBTSE is that there is a new world of creative and intellectual potential that is now neglected and wasted in all of us by a single-minded culture dominated with a suffocating obsession for econometrics, money and growth, problem identification and solving, closed concrete objectives, metrics and measurable targets as opposed to the proposed framework of knowledge, understanding, wisdom, informed open ended exploration, play, imagination, and a much more universal creation philosophy.
